## TN PARTNERS WITH NGA ON CYBERSECURITY

***The State of Tennessee is participating  
with NGA in the 2020 Workshop to  
Advance State Cybersecurity***

In partnership with the Governor's office, the Department of Finance & Administration applied on behalf of the State of Tennessee to participate in the National Governors Association (NGA) Center for Best Practices' Workshops to Advance State Cybersecurity.

TN's application was written in support of the TN Cybersecurity Advisory Council's goal of developing a "whole of government" approach for the state's cybersecurity governance plan. We are proud to share that Tennessee was awarded one of the six competitive spots!

Our participation in this program is most timely, given the new security challenges Tennesseans are facing today – particularly following the recent tornado disasters and COVID 19 crisis. Participants from Governor Lee's office, F&A's Strategic Technology Solutions division, TN Department of Safety and Homeland Security, TEMA, and many others will join forces to improve cybersecurity for state and local governments across Tennessee. NGA staff will act as advisors and will offer technical assistance and expertise throughout the program.

Please join us in congratulating our state on this important achievement!
